

PAYTR TRANSACTION DETAIL SERVICE

You can access the details of the sales and return transactions made within the date duration (3 days maximum) using that service.

- 1- A request is made to transaction detail service <https://www.paytr.com/rapor/islem-dokumu> along with BIN number of the card(The first 6 digits of the card number) and the fields that must be sent.

Compulsory	Explanation	Field name / Type
✓	Merchant Number: Merchant number given to you by PayTR	merchant_id (integer)
✓	Start Date: Date Format: 2021-01-01 00:00:00 (YYYY-MM-DD hh:mm:ss)	start_date (string)
✓	End Date: Date Format: 2021-01-01 23:59:59 (YYYY-MM-DD hh:mm:ss)	end_date (string)
✓	Demo Data: It is used to simulate the data returned from the service. The data are not real, it can only be used for testing.	dummy (1 veya 0)
✓	paytr_token: This value is the one you need to create to make sure the request is coming from you and that the values it contains have not changed.	paytr_token (string)

- 2- Your response to this request is returned in JSON format.
 - a. If there is no transaction within the given date duration, the status value returns **failed**.
 - b. If there is a transaction within the given date duration the status value returns as **"success"** with the information in the table below returns.
 - c. If there is any mistake in the request, the status value returns **"error"**. In this case, you should check the "err_msg" for error details.

When the status value is "successful", the returned values are in the table below. Same values are returned in Sales and Returns transactions.
